Sam Carter

Senior Software Engineer · Payments infrastructure · sam.carter@example.com

EXPERIENCE

Tally (Series C fintech), Senior Engineer, 2022–now

- Led the ledger migration to double-entry: **$2.1B/yr** moved with zero reconciliation breaks
- Cut payout API **p99 by 40%** (820 → 490 ms) by batching ledger writes in Go
- Designed idempotency keys across 14 services; duplicate charges fell to 0

Crescent Health, Software Engineer, 2019–2022

- Built the claims pipeline in Go + Kafka: 3M events/day, exactly-once
- Mentored 4 engineers; ran the on-call rotation for payments

SKILLS

Go, Postgres, Kafka, gRPC, Terraform · distributed ledgers, idempotency, incident response

EDUCATION

B.S. Computer Science, University of Washington, 2019
